

Sofia Matias

DATA ENGINEER · POWER BI REPORT SERVER ADMINISTRATOR

Data Engineer with strong experience in Power BI Report Server administration within the banking sector (on-premises environment). Skilled in platform governance, monitoring, troubleshooting, and BI infrastructure optimization. Brings 20+ years of multidisciplinary engineering experience across software, research, and technical project management.

CORE SKILLS

- Python
- SQL (SQL Server, PostgreSQL, SQLite)
- ETL & Pipelines · Prefect
- Power BI · DAX · Power Query
- Power BI Report Server Admin
- APIs · FastAPI ML basics · Scikit-Learn
- Dashboards · Storytelling
- Git · Docker · CI/CD basics

EDUCATION

- Bootcamp in Data Science** 2022 · Le Wagon
Python, ML, DL, APIs, SQL, MLflow, FastAPI, Streamlit
- Master Executive in Sustainable Energy Systems** 2010-2011 · IST/ISEG/MIT
Energy systems, economics, modelling, leadership
- BSc in Mechanical Engineering (Automation & Robotics)** IST · Lisbon
Control systems, robotics, automation, sensors

LANGUAGES

- Portuguese:** native
- English:** fluent

PROFESSIONAL EXPERIENCE

- Power BI Report Server Administrator / Data Engineer Consultant** 2023-Present · Passio Consulting · Banking
Ensuring stability, governance, and performance of the Power BI Report Server platform in an on-premises banking environment.
 - Full administration of the Power BI Report Server platform (on-premises).
 - Access management, governance, and compliance with banking standards.
 - Development and maintenance of monitoring dashboards for platform health and usage.
 - Technical troubleshooting and incident resolution in collaboration with IT and business teams.
 - Automation of repetitive tasks using Python and PowerShell.
 - Optimization of BI platform performance and reliability.
- Project Manager · Software & Hardware Engineering** 2012-2022 · Albatroz Engenharia
Led multidisciplinary engineering teams delivering software and hardware solutions for aviation and defence.
 - Managed teams across software, hardware, and electronics.
 - Planned, executed, and delivered complex technical projects.
 - Coordinated with clients, partners, and international stakeholders.
 - Ensured quality, documentation, and compliance with technical standards.
 - Oversaw timelines, resources, and project priorities.
- Associate Engineer · CERN (ATLAS Detector)** 2006-2010 · CERN
Supervised HMI software and safety monitoring systems for the ATLAS detector.
 - Defined HMI software specifications and supervised installations.
 - Developed control and monitoring interfaces in high-demand environments.
 - Created ATLAS maps and technical documentation.
 - Trained teams for SLIMOS desk operations.
 - Collaborated with international teams in 24/7 operations.
- Product Engineer · Automotive CD Players** 2002-2006 · Visteon
Managed engineering changes and quality performance in automotive manufacturing.
 - Managed engineering change notices (ECNs).
 - Ensured product quality and performance.
 - Acted as interface between plant, engineering, and OEM clients.
 - Performed failure analysis and implemented corrective actions.
