

SOFIA MATIAS

DATA ENGINEER

ABOUT ME

After 20 years of experience managing engineering projects in different areas, from industry to R&D (at CERN), I now pursue a career change as a **data engineer**.

I have just completed a 10-week data science course at Le Wagon. I now wish to be part of the **development team**, and **apply my managing and programming skills** as a data engineer.

I am open to work as **data analyst** as well

LANGUAGES

Fluent in Portuguese (mother tongue)
Fluent in English (written and spoken)
Basic knowledge of French

INTERESTS

Blog about soapmaking (Wordpress)

CONTACTS

MORE INFO

 <https://sofiamatias.site>

TECHNICAL SKILLS

- Programming with Python
- SQL and SQLite
- Data analysis
- Pandas, Numpy, Matplotlib, Scikit Learn, , Tensorflow/Keras
- Machine learning/Deep learning
- ML Ops, Google Cloud tools

EDUCATION

1994-2001 | Graduation in Mechanical Engineering
IST - Technical University of Lisbon

2022 | Applied Data Science with Python
Coursera (Full Specialization)

2022 | Python For Everybody
Coursera (Full Specialization)

2022 | 10-week Data Science Course
LeWagon Bootcamp

LEWAGON PROJECTS

BioMassters Challenge from Data Driven

Estimation of Finland forest biomass by using **deep learning algorithms and satellite imagery** as input.

Live demo site: [biomassters-demo-website](https://biomassters-demo-website.com)

Challenge from DrivenData, available [here](#) (ranked #61)

Github link available [here](#).

WORK EXPERIENCE

Project Manager | Albatroz Engenharia, S.A. (I&D)
June 2012 until July 2022

- Management of software projects related with LiDAR data analysis/data treatment
- Management of a project for E-Redes with the application of deep learning for tree species identification, resulting in a 80% of correct tree detection
